

2008

1. **Almogi-Labin, A., Edelman-Furstenberg, Y. & Ch. Hemleben.**
Variations in the biodiversity of thecosomatous pteropods during the Late Quaternary as a response to environmental changes in the Gulf of Aden - Red Sea - Gulf of Aqaba ecosystem. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem; 2008]; pp.31-48.
2. **Amar, K-O., Douek, J., Rabinowitz, C. & B. Rinkevich.**
Employing of the amplified fragment length polymorphism (AFLP) methodology as an efficient population genetic tool for symbiotic cnidarians. [Mar. Biotechnol.]; 2008; 10(350-357).
3. **Amar, K.O., Chadwick, N.E. & B. Rinkevich.**
Coral kin aggregations exhibit mixed allogeneic reactions and enhanced fitness during early ontogeny. [BMC Evol. Biol.]; 2008; 8:126.
4. **Bar-El, T., Ashkenazi, S. & F.D. Por.**
The database and collections of DCPE (Data Collecting Program Eilat, 1974-1977) an available tool for research and for monitoring changes in the Gulf of Aqaba-Eilat. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 459-463.
5. **Belmaker, J., Ziv, Y., Shashar, N., Connolly, S.R.**
Regional variation in the hierarchical partitioning of diversity in coral-dwelling fishes. [Ecology]; 2008; 89(2829-2840).
6. **Ben-Avraham, Z., Lazar, M., Ballard, R.D. & F.D. Por.**
Microtopography of a continental rift zone: the Gulf of Eilat (Aqaba). Indications of hydrothermal-connected biological activity. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation. (F.D. Por (Ed.); The Hebrew University Magnum Press, Jerusalem; 2008]; pp. 15-20.
7. **Ben-Tzvi, O., Kiflawi, M., Gaines, S.D., Al-Zibdah, M., Sheehy, M.S., Paradis, G.L. & A. Abelson.**
Tracking recruitment pathways of *Chromis viridis* in the Gulf of Aqaba using otolith chemistry. [Mar. Ecol. Prog. Ser.]; 2008; 359(229-238).
8. **Ben-Tzvi, O., Abelson, A., Polak, O. & M. Kiflawi.**
Habitat selection and the colonization of new territories by *Chromis viridis*. [J. Fish Biol.]; 2008; 73(1005-1018).
9. **Biton, E., Silverman, J. & H. Gildor.**
Observations and modeling of a pulsating density current. [Geophys. Res. Letts.]; 2008; 35(L14603).
10. **Bottger-Schnack, R., Schnack, D. & W. Hagen.**
Microcopepod community structure in the Gulf of Aqaba and northern Red Sea, with special reference to Oncaeidae. [J. Plank. Res.]; 2008; 30(529-550).
11. **Brokovich, E.**
Coral reef fish assemblages in the upper twilight zone (<65m). [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 255-266.
12. **Brokovich, E., Einbinder, S., Shashar, N., Kiflawi, M. & S. Kark.**

Descending to the twilight-zone: changes in coral reef fish assemblages along a depth gradient down to 65m. [Mar. Ecol. Prog. Ser.]; 2008; 371(253-262).

13. **Castruita, M., Shaked, Y., Elmegreen, L.A., Stiefel, E.I. & F.M.M. Morel.**
Availability of iron and iron-storage proteins to marine phytoplankton. [Limnol. Oceanogr.]; 2008; 53(890-899).
14. **Chadwick, N., Duris, Z & I. Horka.**
Biodiversity of and behavior of shrimps and fishes symbiotic with sea anemones in the Gulf of Aqaba, northern Red Sea. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 209-224.
15. **Chen, Y., Paytan, A., Chase, Z., Measures, C., Beck, A.J., Sanudo-Wilhelmy, S.A. & A.F. Post.**
Sources and fluxes of atmospheric trace elements to the Gulf of Aqaba, Red Sea. [J. Geophys. Res.]; 2008; 113(D05306).
16. **Claessens, M., Wickham, S.A., Post, A.F. & M. Reuter.**
Ciliate community in the oligotrophic Gulf of Aqaba, Red Sea. [Aquat. Microb. Ecol.]; 2008; 53(181-190).
17. **Dafni, J.**
Diversity and recent changes in the echinoderm fauna of the Gulf of Aqaba, with emphasis on the echinoids. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 225-242
18. **Darmaillacq, A.S. & N. Shashar.**
Lack of polarization optomotor response in the cuttlefish *Sepia elongata* (d'Orbigny, 1845). [Physiol. Behav.]; 2008; 94(616-620).
19. **Dufresne, A., Ostrowski, M., Scanlan, D.J., Garczarek, L., Mazard, S., Palenik, B.P., Paulsen, I.T., de Marsac, N.T., Wincker, P., Dossat, C., Ferreira, S., Johnson, J., Post, A.F., Hess, W.R. & F. Partensky.**
Unraveling the genomic mosaic of a ubiquitous genus of marine cyanobacteria. [Genome Biology]; 2008; 9(R90).
20. **Elevi Bardavid, R., Khristo, P. & A. Oren.**
Interrelationships between *Dunaliella* and halophilic prokaryotes in saltern crystallizer ponds. [Extremophiles]; 2008; 12(5-14).
21. **Elevi Bardavid, R. & A. Oren.**
Dihydroxyacetone metabolism in *Salinibacter ruber* and in *Haloquadratum walsbyi*. [Extremophiles]; 2008; 12(125-131).
22. **Fishelson, L. & O. Gon.**
Comparative oogenesis in cardinal fishes (Apogonidae, Perciformes), with special focus on the adaptive structures of the egg envelopes. [Environ. Biol. Fish]; 2008; 81(397-414).
23. **Genin, A.**
The physical settings of the Gulf of Aqaba: an explanation for a unique occurrence of tropical communities in the subtropics. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation. (F.D. Por (Ed.); The Hebrew University Magnum Press, Jerusalem; 2008]; pp. 15-20.
24. **Golani, D., Lerner, A. & B. Appelbaum-Golani.**

Fish diversity in the sandy shore of the Gulf of Eilat in close proximity to nearby fish farm activity. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 267-280.

25. **Goodman, B., Reinhardt, E., Dey, H., Boyce, J., Schwarcz, H., Sahoglu, V., Erkanal, H. & M. Artzy.**
Evidence for holocene marine transgression and shoreline progradation due to barrier development in Iskele, Bay of Izmir, Turkey. [J. Coast. Res.]; 2008; 24(1269-1280).
26. **Goren, M.**
The fishes of the Red Sea: History of research, biogeography and biodiversity. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 243-253
27. **Hadas, E., Ilan, M., Shpigel.**
Oxygen consumption by a coral reef sponge. [J. Exp. Biol.]; 2008; 211(2185-2190).
28. **Halicz, L., Segal, I., Fruchter, N., Stein, M. & B. Lazar.**
Strontium stable isotopes fractionate in the soil environments? [Earth & Planet. Sci. Letts.]; 2008; 272(406-411).
29. **Hall-Spencer, J.M., Rodolfo-Metalpa, R., Martin, S., Ransome, E., Fine, M., Turner S.M., Rowley, S. Tedesco, D. & M.C. Buia.**
Volcanic carbon dioxide vents reveal ecosystem effects of ocean acidification. [Nature]; 2008; 454(96-99).
30. **Harel, M., Ben-Dov, E., Rasoulouniriana, D., Siboni, N., Kramarsky-Winter, E., Barak, Z., Wiseman, Z. & A. Kushmaro.**
A new Thraustochytrid, strain *Fng1*, isolated from the surface-mucus of the hermatypic coral *Fungia granulosa*. [FEMS Microbiol. Ecol.]; 2008; 64(378-387).
31. **Iluz, D., Yehoshua, Y. & Z. Dubinsky.**
Quantum yields of phytoplankton photosynthesis in the Gulf of Aqaba (Eilat), Northern Red Sea. [Isr. J. Plant Sci.]; 2008; 56(29-36).
32. **Kamennaya, N.A., Chernihovsky, M. & A.F. Post**
The cyanate utilization capacity of marine unicellular cyanobacteria. [Limnol. Oceanogr.]; 2008; 53(2485-2494).
33. **Kimor, B.**
Salient features of the microplankton of the Gulf of Aqaba. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : (F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem; 2008]; pp. 97-209.
34. **Kisakurek, B., Eisenhauer, A., Bohm, F., Gare-Schonberg, D. & J. Erez.**
Controls on shell Mg/Ca and Sr/Ca in cultured planktonic foraminiferan, *Globigerinoides ruber* (white). [Earth & Planet. Sci. Letts.]; 2008; 273(260-269).
35. **Kuguru, B., Chadwick, N.E., Achituv, Y., Zandbank, K. & D. Tchernov.**
Mechanisms of habitat segregation between corallimorpharians: photosynthetic parameters and *Symbiodinium* types. [Mar. Ecol. Prog. Ser.]; 2008(115-129).
36. **Lampert, Y., Kelman, D., Nitzan, Y., Dubinsky, Z., Behar, A. & R.T. Hill.**
Phylogenetic diversity of bacteria associated with the mucus of Red Sea corals. [FEMS Microbiol. Ecol.]; 2008; 64(187-198).

37. **Lampert-Karako, S., Stambler, N., Katcoff, D.J., Achituv, Y., Dubinsky, Z & N. Simon-Blecher.**
Effects of depth and eutrophication on the zooxanthella clades of *Stylophora pistillata* from the Gulf of Eilat (Red Sea). [Aquatic Conserv. Mar. Freshw. Ecosyst.]; 2008; 18(1039-1045).
38. **Lampert, Y., Kelman, D., Dubinsky, Z., Nitzan, Y. & R.T. Hill.**
The biodiversity of coral-associated bacteria of the Gulf of Eilat. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem; 2008]; pp.75-95.
39. **Lazar, B., Erez, J., Silverman, J., Rivlin, T., Rivlin, A., Dray, M., Meeder, E & D. Iluz.**
Recent environmental changes in the chemical-biological oceanography of the Gulf of Aqaba (Eilat). [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : (F.D. Por (Ed.); The Hebrew University Magnum Press, Jerusalem; 2008]; pp. 49-61.
40. **Lee, J.**
New knowledge on the biology of larger foraminifera and microforaminifera gained from investigations at the Heinz Steinitz IUI laboratory. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 417-438.
41. **Makovsky, Y., Wunch, A., Ariely, R., Shaked, Y., Rivlin, A., Shemesh, A., Ben-Avraham, Z. & A. Agnon.**
Quaternary transform kinematics constrained by sequence stratigraphy and submerged coastline features: The Gulf of Aqaba. [Earth & Planet. Sci. Letts.]; 2008; 271(109-122).
42. **Mass, T. & A. Genin**
Environmental versus intrinsic determination of colony symmetry in the coral *Pocillopora verrucosa*. [Mar. Ecol. Prog. Ser.]; 2008; 369(131-137).
43. **Morel, F.M.M., Kustka, A.B. & Y. Shaked.**
The role of unchelated Fe in the iron nutrition of phytoplankton. [Limnol. Oceanogr.]; 2008; 51(400-404).
44. **Perelis-Grossowicz, L., Edelman-Furstenberg, Y. & A. Almogi-Labin.**
Characteristics of the shallow-water benthic foraminifera in the northernmost Gulf of Eilat. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem]; pp. 439-458.
45. **Perkol-Finkel, S., Zilman, G., Sella, I., Miloh, T & Y. Benayahu.**
Floating and fixed artificial habitats: Spatial and temporal patterns of benthic communities in a coral reef environment. [Estuar. Coast. Shelf S.]; 2008; 77(491-500).
46. **Por, F.D.**
Life beyond salinity 41 ppm: Metahaline environments and anchialine pools in the Gulf of Aqaba-Eilat. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation; F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem; 2008]; pp. 135-152.
47. **Post, A.F., Golan, D., Zandbank, K. & S. Penno.**
Phytoplankton communities of the Gulf of Aqaba, northern Red Sea. [In: Aqaba-Eilat, the Improbable Gulf - Environment, Biodiversity and Preservation : F.D. Por (Ed.), The Hebrew University Magnum Press, Jerusalem; 2008]; pp.119-133.
48. **Reshef, L., E.Z. Ron & E. Rosenberg.**

Genome analysis of the coral bleaching pathogen *Vibrio shiloi*. [Arch. Microbiol]; 2008; 190(185-194).
